HDR Scholarship Program

architecture

2020

About this Scholarship

Our scholarship committee will grant two $10,000 scholarships to two exceptional graduate-level students, preferably enrolled in an architecture or architectural related program. Along with the scholarship, the students must be willing to accept a paid internship.

We will determine the location of the internship by matching the interest of the student with an HDR office that offers a strong mentoring opportunity for a future architectural design professional. Housing and transportation are not provided for the internship.

HOW TO APPLY
