LiveBy GIS Internship

Overview

LiveBy is assembling a 2-4 person team of UNL students that will work together to map out the Nation's neighborhoods over a period of 8 weeks beginning July 11th, 2018.

LiveBy, a Lincoln-based startup, serving North America's top real estate firms with one of the largest geospatial databases in the Country; covering 50 states, 3,500 cities, and over 100,000 neighborhoods.

Individual Responsibilities:

- Collect boundaries and data from local municipalities and other open data sources.
- Use current online references to define boundaries of previously unmapped neighborhoods.
- Collaborate with our clients around the Country to identify and map neighborhoods in their area.
- Support process improvements and work with our product team to improve the internal tools used for drawing neighborhood boundaries.

Requirements

Experience using either QGIS or ArcMap to create maps, manipulate data, and perform geospatial analysis is a plus, but not required.

The ideal candidate

- Is a quick learner
- Requires minimal direction
- Is willing to try new tasks
- Loves to work in a fast-paced, ever-changing and highly innovating environment.
- Has the drive to go above and beyond
- Exemplifies high attention to detail and excellent communication skills

Program Perks

- High potential for full-time position post-graduation.
- Receive incredible hands-on experience as part of a flexible, fun and engaging startup culture in the heart of the Haymarket.
- Enjoy autonomy with experimenting, problem-solving and implementing your own ideas.
- Gain instant access to downtown's coolest rooftop, and to all the nerf guns, office dogs and snacks a person's heart may desire.

How to Apply

Please email Matan@LiveBy.com to indicate your interest in this position. Please include information about your background and any GIS experience. Get in touch before Friday, December 14th, 2018 as we are looking to fill this position quickly.
