

## SUSTAINABILITY SUMMER INTERN

**Wight & Company** is a leading Architectural, Engineering and Construction firm that has been rated by the Chicago Tribune as one of Chicago's Top Workplaces!

Wight brings together experts from different disciplines to work collaboratively as a single unit. We continue to pioneer new ways to meld our world-class capabilities and sustainable design principles to create exceptional, enduring spaces for our clients. We value honesty and integrity – with each other, with our trade partners and with our clients. Our firm places emphasis on teamwork – listening, contributing, guiding and learning.

Wight is currently looking for a Summer intern to work in our Sustainability group. Wight interns have opportunities to work with the architecture and construction teams and to also collaborate with Wight's engineers.

Wight has one of the most robust Summer Intern programs in the industry! Sustainability interns have numerous opportunities to network with both Architecture/Engineering/Construction Management professionals *and* interns from all the various departments at Wight. The relationships forged during an internship can last the duration of a career!

### **Responsibilities:**

- Work with project teams to research sustainability practices on projects
- Work with Project Managers and Superintendents on construction sites to verify sustainability standards are being met.
- Attend team meetings in-house and on-site for construction projects

### **Requirements:**

- Current student pursuing a Bachelor's/Master's degree in Architecture, Mechanical/Energy Engineering or Sustainability
- Strong communication skills
- Basic understanding of Architecture drawings
- Good organization and computer skills
- Openness to learn and have fun
