RESEARCH / PUBLICATION

2016 - Project *Urban Underspace*
A research project co-founded with Gandong Cai at Harvard GSD. The research investigates the neglected and abandoned spaces produced as a side product of infrastructure projects in dense urban cores, and proposes to adapt and invigorate it as ground for new public space. It has been published academically and as an exhibition at Shenzhen Museum of Contemporary Arts and Planning Exhibitions (MoCAPE)

Wang, Yujia, and Cai, Gandong. “*Reinvigorating Urban Under Space: Towards a New Type of Public Landscape.*” *Nakhara: Journal of Environmental Design and Planning* 13 (2017): 41-58.

2011 National Scholarship
Ministry of Education
Beijing, CHN

PRACTICE

My focus of landscape works has been of creating and iterating the place of gathering, and of delivering the vision through grounded operations.

The definition allows me to experiment with the effectiveness of different project types, to work with each the unique sets of drivers, constraints and potentials, and to examine the meaning of public space at different scales and for different clients / missions.

The body of work has been carried out both in the United States and in international context. In this way, culture background, climate, population, technical capacities, local regulations etc. becomes part of the calculation as well.

Built

vivo Global Headquarters Landscape
